MOCK TEST PAPER - 2

INTERMEDIATE (New): GROUP – I

PAPER – 1: ACCOUNTING

SUGGESTED ANSWERS/HINTS

Test Series: April, 2019

1. (a) As per para AS 2 'Valuation of Inventories', abnormal amounts of wasted materials, labour and other production costs are excluded from cost of inventories and such costs are recognized as expenses in the period in which they are incurred. The normal loss will be included in determining the cost of inventories (finished goods) at the year end.

Amount of Normal Loss and Abnormal Loss:

Material used	12,000 MT @ Rs. 150 = Rs. 18,00,000
Normal Loss (4% of 12,000 MT)	480 MT
Net quantity of material	11,520 MT
Abnormal Loss in quantity	150 MT (630 MT less 480 MT)
Abnormal Loss	Rs. 23,437.50 [150 units @ Rs. 156.25 (Rs.18,00,000/11,520)]

Amount Rs. 23,437.50 will be charged to the Profit and Loss statement.

(b) In the books of Ram Ltd.

If the grant is credited to Deferred Grant Account:

As per AS 12 'Accounting for Government Grants,' income from Deferred Grant Account is allocated to Profit and Loss account usually over the periods and in the proportions in which depreciation on related assets is charged.

Accordingly, in the first two years (Rs. 32 lakhs /4 years) = Rs. 8 lakhs x 2 years = Rs. 16 lakhs will be credited to Profit and Loss Account and Rs. 16 lakhs will be the balance of Deferred Grant Account after two years.

Therefore, on refund of grant, following entry will be passed:

			Rs.	*Rs.*
I	Deferred Grant A/c	Dr.	16 lakhs	
	Profit & Loss A/c	Dr.	16 lakhs	
	To Bank A/c			32 lakhs
	(Being Government grant refunded)			

1. **Value of Fixed Assets after two years but before refund of grant**

   Fixed assets initially recorded in the books = Rs. 80 lakhs

   Depreciation for each year = (Rs. 80 lakhs – Rs.8 lakhs)/4 years = Rs. 18 lakhs per year

   Book value of fixed assets after two years = Rs. 80 lakhs – (Rs. 18 lakhs x 2 years) = Rs. 44 lakhs

2. **Value of Fixed Assets after refund of grant**

On refund of grant the balance of deferred grant account will become nil. The fixed assets will continue to be shown in the books at Rs. 44 lakhs.

3. **Amount of depreciation for remaining two years**

Depreciation will continue to be charged at Rs. 18 lakhs per annum for the remaining two years.

(c) As per AS 4 'Contingencies and Events Occurring After the Balance Sheet Date', adjustment to assets and liabilities are required for events occurring after the balance sheet date that provide additional information materially affecting the determination of the amounts relating to conditions existing at the Balance Sheet date.

A debtor for Rs. 20,00,000 suffered heavy loss due to earthquake in the last week of February, 2019 which was not covered by insurance. This information with its implications was already known to the company. The fact that he became bankrupt in April, 2019 (after the balance sheet date) is only an additional information related to the condition existing on the balance sheet date.

Accordingly, full provision for bad debts amounting Rs. 20,00,000 should be made, to cover the loss arising due to the insolvency of a debtor, in the final accounts for the year ended 31st March 2019. Since the company has already made 5% provision of its total debtors, additional provision amounting Rs. 19,00,000 shall be made (20,00,000 x 95%).

(d) As per AS 1, any change in the accounting policies which has a material effect in the current period or which is reasonably expected to have a material effect in later periods should be disclosed. In the case of a change in accounting policies which has a material effect in the current period, the amount by which any item in the financial statements is affected by such change should also be disclosed to the extent ascertainable. Where such amount is not ascertainable, wholly or in part, the fact should be indicated. Accordingly, the notes on accounts should properly disclose the change and its effect.

Notes on Accounts:

So far, the company has been providing 2% of sales for meeting "after sales expenses during the warranty period. With the improved method of production, the probability of defects occurring in the products has reduced considerably. Hence, the company has decided not to make provision for such expenses but to account for the same as and when expenses are incurred. Due to this change, the profit for the year is increased by Rs. 12 crores than would have been the case if the old policy were to continue.

Therefore, firstly Rs.2,000 is to be paid to Z, then X and Z to be paid in proportion of 5:4 upto Rs. 18,000 to bring the capital of all partners X, Y and Z in proportion to their profit sharing ratio. Thereafter, balance available will be paid in the profit sharing ratio 5:4:4 to all partners viz X, Y and Z.

(b) Under section 64 of the LLP Act, 2008, an LLP may be wound up by the Tribunal:

- If the LLP decides that it should be wound up by the Tribunal;
- If for a period of more than six months, the number of partners of the LLP is reduced below two;
- If the LLP is unable to pay its debts;
- If the LLP has acted against the interests of the integrity and sovereignty of India, the security of the state or public order;
- If the LLP has defaulted in the filing of the Statement of Account and Solvency with the Registrar for five consecutive financial years;
- If the Tribunal is of the opinion that it is just and equitable that the LLP be wound up.

Working Note:

Calculation of grossing-up of dividend

Particulars	*Rs.*
Dividend distributed by Alpha Ltd. (5% of 49,95,000)	2,49,750
Add: Increase for the purpose of grossing up of dividend $\left[\frac{15}{100-15}\times 2{,}49{,}750\right]$	44,074
Gross dividend	2,93,824
Dividend distribution tax @ 17.304%	50,843

(b) Ex-right value of the shares

= (Cum-right value of the existing shares + Rights shares x Issue Price) / (Existing No. of shares + No. of right shares) = (Rs. 200 X 5 Shares + Rs. 125 X 1 Share) / (5 + 1) Shares

= Rs. 1,125 / 6 shares = Rs. 187.50 per share.

Value of right = Cum-right value of the share – Ex-right value of the share

= Rs. 200 – Rs. 187.50 = Rs. 12.50 per share.

6. **(a)** Statement showing the calculation of profits/losses for pre incorporation and Post incorporation period profits of Sanjana Ltd.

for the year ended 31st March, 2017

Particulars	**Basis**	**Pre**	**Post**
		Rs.	*Rs.*
Sales (given)		10,000	40,000
Less: Purchases	1:3.3	5,814	19,186
Carriage Inwards	1:3.3	237	782
Gross Profit (i)		3,949	20,032
Less: Selling Expenses	1:4	700	2,800
Preliminary Expenses			1,200

Director Fees			1,200

Interest on capital		700	
Depreciation	1:3	700	2,100
Rent	1:3	1,200	3,600
Total of Expenses(ii)		4,200	13,600
Capital Loss/Net Profit (i-ii)		(251)	6,432

Working Notes:

1: Sales Ratio = 10,000 : 40,000 = 1 :4

2: Time Ratio = 3:9 = 1:3

3: Purchase Price Ratio

$\therefore$ Ratio is 3 : 9

But purchase price was 10% higher in the company period

$\therefore$ Ratio is 3 : 9 + 10% ie. 3:9.9 = 1:3.3.

(viii) Current Assets

(c) The entity has charged depreciation using the straight-line method at Rs. 1,00,000 per annum i.e (5,00,000/5 years). On 1st January 2017, the asset's net book value is [5,00,000 – (1,00,000 x 4)] Rs. 1,00,000. The remaining useful life is 4 years. The company should amend the annual provision for depreciation to charge the unamortized cost over the revised remaining life of four years. Consequently, it should charge depreciation for the next 4 years at Rs. 25,000 per annum i.e. (1,00,000 / 4 years).

(d) The Framework for Recognition and Presentation of Financial statements recognises four alternative measurement bases for the purpose of determining the value at which an element can be recognized in the balance sheet or statement of profit and loss. These bases are: (i)Historical Cost; (ii)Current cost (iii) Realisable (Settlement) Value and (iv) Present Value.

A brief explanation of each measurement basis is as follows:

1. **Historical Cost**: Historical cost means acquisition price. According to this, assets are recorded at an amount of cash or cash equivalent paid or the fair value of the asset at the time of acquisition. Liabilities are generally recorded at the amount of proceeds received in exchange for the obligation.

2. **Current Cost:** Current cost gives an alternative measurement basis. Assets are carried out at the amount of cash or cash equivalent that would have to be paid if the same or an equivalent asset was acquired currently. Liabilities are carried at the undiscounted amount of cash or cash equivalents that would be required to settle the obligation currently.

3. **Realisable (Settlement) Value:** As per realisable value, assets are carried at the amount of cash or cash equivalents that could currently be obtained by selling the assets in *an orderly disposal*. Liabilities are carried at their settlement values; i.e. the undiscounted amount of cash or cash equivalents paid to satisfy the liabilities in the normal course of business.

4. **Present Value**: Under present value convention, assets are carried at present value of future net cash flows generated by the concerned assets in the normal course of business. Liabilities under this convention are carried at present value of future net cash flows that are expected to be required to settle the liability in the normal course of business.
