2.3.1 - Student-centric methods, such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences

1. Department of Computer Science organizes a 6-day workshop on IoT for the students of M.Sc. Computer Science, in collaboration with the Electronics Service and Training Center, Haldwani. The workshop aims to explore the state-of-the-art technologies in the area of the Internet of Things through the lectures delivered by eminent persons working in this field and to provide some hands-on experience in setting up IoT platforms with open-source software. Unfortunately, this workshop could not be organized this year.

As a collaborative effort, the Department of Psychology, as part of the conduction of the annual PG Diploma Course in Guidance & Counselling Skills collaborated with the Govt. Medical College, Haldwani for an internship of the enrolled students for 3 months extensive as well as an intensive internship, undertaken by two departments of the medical college-(i) Department of Pediatrics and (ii) Department of Psychiatry, on a rotational basis, undertaking 10 students each for 10 days. Over the last two years or so, a number of students have benefited from the initiative. We have also approached the medical College authorities to distribute a certificate of internship to the students taking part/completing the internship successfully.

Internship is also availed by Department of Biotechnology students for undertaking their dissertation work in the final semester. This year their number was 11, while additional 3 students across other streams too undertook internship, or workshop, from outside. Under the mandate of NEP, students are also being imparted the practical knowledge of activities such as vermicomposting, etc.

6. The computer science department, in collaboration with the MSME Technology Centre, Electronics Service and Training Centre (Ministry of MSME, Govt. of India), Kamiya, Ramnagar (Nainital), with whom the college has signed a MoU, organises programmes or workshop for the students. This year, 4 students undertook the Computer Hardware and Networking training workshop (from 3rd February to 1st March 2025); while, additional 47 students undertook the Entrepreneurship-cum-skill development Programme (from 3rd February to 15th March 2025) on the topic Computer hardware, Networking and Maintenance.
