(2024-25)

4.3.1 - The institution frequently updates its IT facilities including Wi-Fi

1. The college campus is Wi-Fi enabled with a bandwidth of 100 MBPS, to 3300 GB, and up to 2 Mbps. The students enrolled can directly access the internet facility through a simple mechanism that generates an OTP, and thus the accessibility.

2. At present, 17 departments, and individual faculty members vested with additional responsibilities, such as IQAC, AISHE, KPI, and committees, such as Admission, Examination, Career Counseling, and like, have been facilitated with a direct Broadband facility. The names of the different departments and cells are the following: (i) Computer Science, (ii) UGC & IQAC, (iii) AISHE & KPI, (iv) Accounts Office, (v) Admission Cell, (vi) Department of Geography, (vii) Career Counseling Cell, (viii) Department of Biotechnology, (ix) Yoga, (x) Self-financed B. Ed, (xi) Department of Physics, (xii) NCC, (xiii) Examination Cell, (xiv) Education, (xv) the college central library, (xvi) NCC, and (xvii) Sports.

3. The rest of the departments, including the University Examination internal evaluation hall, are extended the facility through LAN or router system, or in the case of Wi-Fi through VAN. In other words, all the computers (presently numbering 77) with the institute are invariably facilitated with an Internet connection. In other words, we have made the provision to facilitate online or the conduction of classes through the extension of the internet facility.

4. Wi-fi, and broad band facility in turn facilitates the students, and more significantly the research scholars to optimise the use of the online journals through ONOS and DelNet.

This is to certify that the information provided above is correct to the best of my knowledge & belief.
