(2024-25)

6.5.2 - The institution reviews its teaching-learning process, structures & methodologies of operations, and learning outcomes at periodic intervals through IQAC setup as per norms and records the incremental improvement in various activities

1. Academic review meets of the Heads of the departments- IQAC conducts periodical meetings with the department heads, and other committee heads, from time to time. Faculty heads are encouraged to discuss academic and other administrative issues. At the departmental level, the faculty- the teachers, and the student representative (departmental associations) interact regarding the changes in the curriculum, new teaching methods, and ICT use. The feedback received from the students is shared with each of the department heads, encouraging them to redress their grievances of the students, as also to undertake remedial measures.
2. Creation of ICT-enabled infrastructure- IQAC has led to an emphasis on making use of ICT tools in teaching. The IQAC has advised the administration to enrich ICT infrastructure by purchasing advanced ICT tools, smart boards, DLPs, as well as to enable each department with and broadband, internet Wi-Fi, which all have been duly installed in each department. In addition, the whole college campus has been Wi-Fi enabled, for availing the internet facility to all the students. Currently, all the departments have access to the very basic infrastructure in the form of a computer, a D-Link internet facility, and a laser printer, with a majority in possession of smart boards and/or DLPs.
3. Students' feedback, and issues raised are redressed- The student feedback and the satisfaction reports are collated, analysed and the issues are made available to the faculty, as well as posted in the college web site. Most of the issues raised relates to providence of basic infrastructural support- lavatories, water supply, cleanliness, etc, which are duly addressed by the college administration.
4. Accessibility to offline, online journals, as also DelNet, and ONOS- The college recently registered itself to the One Nation One Subscription (ONOS), as also DelNet, towards efforts to provide maximum possible support to the research scholars.
5. Regular PTA meets are held to elicit feedback from the parents. Their recommendations are then forwarded to the principal for implementation. Over the last few years, the PTA meets have elicited positive response from the parents, that speaks of the redressal of students /wards issues by the administration.
6. IIRS, and IPR Cell- Since becoming the nodal centre for IIRS online courses, a number of students undertook basic courses related to Remote Sensing & GIS. The IPR Cell too has been

recognised by the U-COST (Uttarakhand Council of Science & Technology), which provides financial support as well as experts, as annual feature.

7. Green campus initiatives- IQAC has been successful in implementing its demand for installing/constructing water harvesting structures in two of the recently constructed building- the girls' hostel and the Yoga Bhawan, as also for operationalization of the solar plant, and the ground water re-charge pits.

8. Renovation of the PG chemistry lab. - The chemistry department, as a whole underwent major renovation, and re-construction work, with additional laboratory space for the research scholars, rooms for upkeep of chemicals, as also lecture theatre.

9. Portraits of the luminaries- 200 portraits of luminaries across the different (20) subjects were mounted in the galleries for the benefit of the students.

Ground water recharge pits have now become fully functional.

This is to certify that the information provided above is correct to the best of my knowledge & belief.
